TECHNICAL SKILLS

FRONTEND

HTML5 CSS3 React.js
Tailwind TypeScript Angular
SASS

BACKEND

Node.js Python Java
Express.js REST APIs

DATABASE

SQL MongoDB NoSQL
GraphQL

AI / ML

Machine Learning NumPy
Pandas Prompt Eng.

TOOLS & DEVOPS

Git GitHub Vercel Vite
VS Code

KEY ACHIEVEMENTS

- 🏆 **SIH Semi-Finalist**
Qualified in top 50 teams at Smart India Hackathon 2026
- 🚀 **FlyRank AI Internship**
AI Backend Engineer Intern at FlyRank AI (Aug 2026)
- ⚡ **HackaMania**

PROFESSIONAL SUMMARY

Dedicated **AIML student** and Full Stack Developer building a strong foundation in core computer science principles. Proficient in solving **complex problems** using Data Structures and Algorithms in Java. Experienced **full stack developer** skilled in building interactive websites and web applications. Adept at leveraging **AI tools like Claude** to speed up development and boost productivity. Passionate about clean **API design** and building efficient software systems. Currently an AI Backend Engineer Intern at **FlyRank AI**, automating organic growth for brands using next-gen AI search engines.

EXPERIENCE

- 🕒 **AI Backend Engineer Intern** Aug 2026 – Present
FlyRank AI Remote
 - ▶ Working as an AI Backend Engineer at FlyRank AI — automating organic growth for brands in classic and next-gen AI search engines
 - ▶ Building and optimizing backend APIs and AI-integrated workflows for real-time SEO automation
 - ▶ Collaborating with a remote team to ship production-grade features using Node.js and Python
- 🕒 **IBM Developer Skills Network** 2025
IBM — Data Science Methodology Online
 - ▶ Completed IBM Data Science Methodology certification covering end-to-end ML project workflows
 - ▶ Gained hands-on experience with structured data analysis, model evaluation, and deployment concepts

EDUCATION

- 🕒 **B.Tech — Computer Science Engineering (AIML)** Sep 2024 – Jun 2028
ABES Engineering College, Ghaziabad Ghaziabad, UP
 - ▶ 3rd Year student specializing in Artificial Intelligence & Machine Learning
 - ▶ Core subjects: Data Structures, Algorithms, Machine Learning, Full Stack Development, DBMS, OOP
 - ▶ Actively participating in hackathons, coding competitions, and open-source projects

FEATURED PROJECTS

- Defensys — AI Cybersecurity Defense System** github.com/Ayushch-2800/Defensys

An AI-powered cybersecurity platform built with Python that leverages machine learning to detect and respond to security threats in real-time. Implements behavioral anomaly detection and automated defense workflows to reduce response time significantly.

Python Machine Learning Cybersecurity AI/ML REST APIs Backend
- NutroHeist — AI Food Ingredient Safety Scanner** github.com/Ayushch-2800/NutroHeist

A web application that scans packaged food ingredient labels and instantly determines whether they are safe to eat. Uses AI analysis to flag harmful additives, generates safety scores, and provides health recommendations. Received community fork recognition.

HTML5 CSS3 JavaScript AI Integration Responsive Design
- VidyaPulse AI — Intelligent Education Platform** github.com/Ayushch-2800/VidyaPulse-AI

Participant — organized by THE ELITES, Gurgaon

Text-to-Image AI Story Generator

github.com/Ayushch-2800/text-imageStory

An AI-powered web tool that converts text prompts into illustrated image stories with dynamic visual changes. Demonstrates advanced prompt engineering and generative AI integration for creative storytelling applications.
